PROJECTS

Code Editor (<https://apexscript.netlify.app>)

- Built a Code Editor using HTML, CSS, Tailwind CSS and React JS.
- Features include syntax highlighting, multi-language support and responsive design.
- Focused on delivering a clean user interface and seamless coding experience.

Library Management System :

- Designed and implemented a Python-based system to streamline library operations.
- Integrated SQLite for efficient data storage and management of books, members, and transactions.
- Ensured a user-friendly interface and optimized functionality for real-world applications.

Weather Application (<https://yash-climateinsight.vercel.app>)

- Created an interactive JavaScript-based weather app that fetches real-time data using a weather API.
- Ensured responsive design for accessibility across devices.
